

Registration

The registration deadline for the workshop is **August 31st, 2019**. To register, please send an e-mail with the following information to: hymod.workshop@hydrology.uni-freiburg.de

Name, E-mail address, Institution
Research focus / Field of interest
Topic

Moreover, we ask you to fill out the following questionnaire:

Questionnaire (<https://bit.ly/2Ueq1ji>)

Participation is free of cost. The number of participants is limited to 20 people.

Accommodation

The participants organize and cover the costs of the accommodation themselves.

Venue

University of Freiburg
Faculty of Environment and Natural Resources
Tennenbacher Straße 4
D-79106 Freiburg

Aim and background

The workshop aims to gather young scientists of various disciplines and levels (M.Sc, PhD) with a strong interest in hydrological modeling. The workshop is organized by the Hydrological Chairs of Freiburg University.

The aim of the workshop is to discuss modeling approaches in a more informal atmosphere. In particular, we are striving for a synthesis of hydrologic modeling across different landscapes (e.g., mountains, karst, agriculture, semi-arid, different landscapes and discuss the applied modeling approaches. With the workshop we want to provide an overview on the modeling challenges and characteristics of the different landscapes. Moreover, participants may use this synthesis to advance their own approaches.

What is your landscape?

Scientific contributions

Compared to tightly scheduled scientific conferences, the workshop has its main emphasis on discussion. We ask each participant to contribute with a presentation to introduce her/his landscape. In order to preserve sufficient time for discussion, the presentation time is limited to max. 10 minutes. We encourage the participants to focus on the specific characteristics of their hydrologic landscape for hydrologic modeling. In order to make the workshop as effective as possible we kindly ask you to fill out the provided questionnaire:

<https://bit.ly/2HS6Rt2>

The official workshop language is English.

Key topics

- Hydrologic modeling from plot scale to large scale
- Landscape-dependent hydrological processes
- Landscape parameterization
- Uncertainty analysis
- Scenario-based studies
- Improving process representations
- ...

Program

07/10/2019	Introduction Key note lecture Presentations Dinner and get together
08/10/2019	Key note lecture Break-out groups Excursion Dinner and get together
09/10/2019	Short course on sensitivity analysis

A detailed program will be sent to the participants after the registration has ended.
